02 Access & admin credentials

03 What was delivered — public website

04 Product pages & demo credentials

05 Book-a-demo flow & emails

06 Admin console — product handling

07 Admin console — homepage, content, bookings, QR

08 SEO, AI discovery & search indexing

09 Responsive & quality testing

10 Architecture & repository structure

11 Environment, infrastructure & deployment

12 Go-live checklist & open items

Live preview: https://remarketplacewebsite.vercel.app · **Target domain:** https://remarketplace.store
Repository: github.com/resystem-fractionair/remarketplace_website (branch `main`, auto-deploys to Vercel)

01 Executive summary

reMarketplace has been moved out of resystem.org into its own standalone website. The site presents the full ReSystem product suite as white-label products that businesses can rebrand and launch, with live demos, sandbox credentials, brochures, investment links and a booking flow with real specialists. Every text, product, image, category, booking rule and SEO field is editable from a single admin console, with no code changes needed.

17
products migrated with details, PDFs, demo + invest links

6
admin sections (full CMS)

5-step
booking wizard with agents & emails

108 s
narrated explainer with music

Delivery status

Area	Status	Notes
Public website (home, catalog, product pages)	**Delivered**	Animated hero, explainer, why / steps / glossary, use cases, FAQ
Admin console (CMS)	**Delivered**	Products, homepage, site content, categories, bookings, QR & SEO
Book-a-demo + emails	**Delivered**	Needs SMTP env vars to send email
Explainer video	**Delivered**	Natural voice (Kokoro) + ambient music, 8 animated chapters
SEO / AI discovery	**Delivered**	Meta, OG, JSON-LD, sitemap, robots, llms.txt, IndexNow
Database (Supabase)	**Ready**	Tables + storage bucket created; activates with env vars
Domain remarketplace.store	**Pending**	Add in Vercel → Domains, then DNS
Search Console / Bing verification	**Pending**	Needs domain live; codes go in admin
Real agents, sandbox creds, missing images	**Pending content**	Placeholders in place, editable in admin

02 Access & admin credentials

Confidential. Share this page only with people who need admin access. Change the password after handover by editing `ADMIN_PASSWORD` in Vercel and redeploying.

Item	Value
Admin URL	https://remarketplacewebsite.vercel.app/admin (later https://remarketplace.store/admin)
Username	`admin`
Password	*shared privately by Manoj (not stored in the repo)*
Where it is set	Vercel → remarketplace_website → Settings → Environment Variables → `ADMIN_USER`, `ADMIN_PASSWORD`
Login protection	Constant-time comparison, max 10 attempts per 15 min per IP, signed session cookie (`SESSION_SECRET`)
Local development	Without env vars the password is `admin` (dev only — never in production)

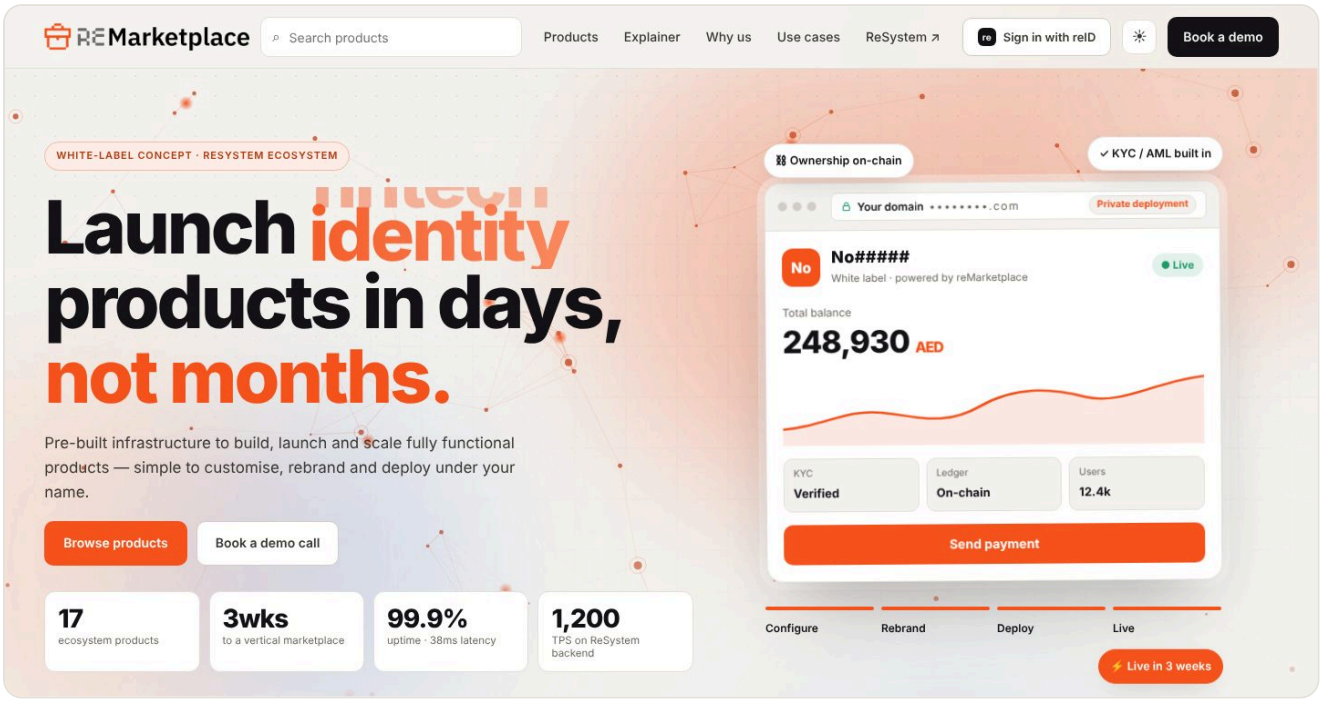

Infrastructure access

Service	Identifier
GitHub	resystem-fractionair/remarketplace_website
Vercel	Team **re-system** · project **remarketplace_website** (prj_0wcdKlumd5oHGX11AsRWB3It22MO)
Supabase	Re-system-org's Project · ref `plqxwrvktriaclifwurc` · https://plqxwrvktriaclifwurc.supabase.co
Storage bucket	`rm-images` (public) — admin uploads
Email	info@remarketplace.store (booking notifications) via SMTP env vars

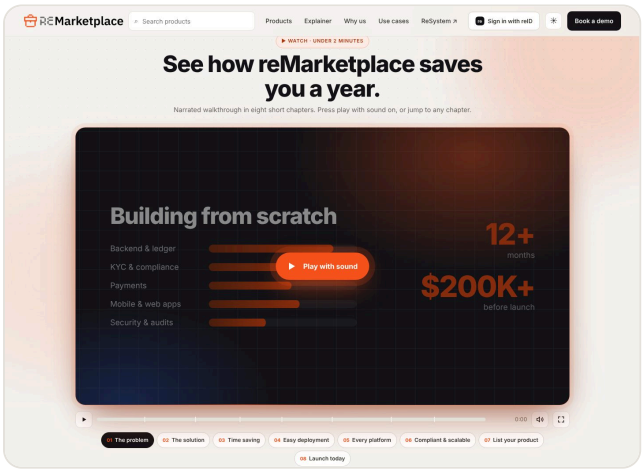

Security action: the Supabase secret and service-role keys were shared in chat during the build. Rotate them in Supabase → Project Settings → API Keys and paste the new value into `SUPABASE_SERVICE_ROLE_KEY` in Vercel.

03 Public website

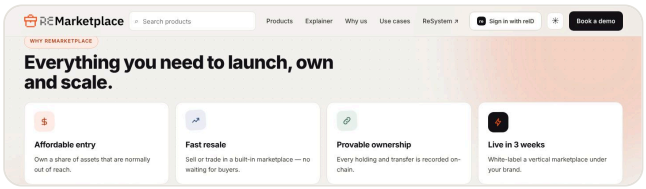

The homepage is a single scrolling page built from admin content. Product names and domains in the hero animation are masked ("Your domain ••••••••.com", "No#") so no client is exposed.

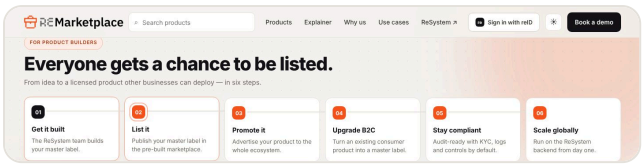

Hero — fixed headline with a rotating word (fixed-width slot, no layout shift), network canvas background, white-label motion graphic.

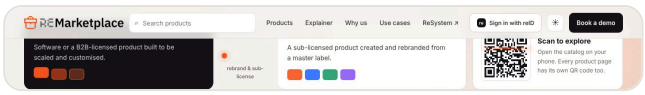

Explainer — centred “second hero” with chapters, progress and fullscreen.

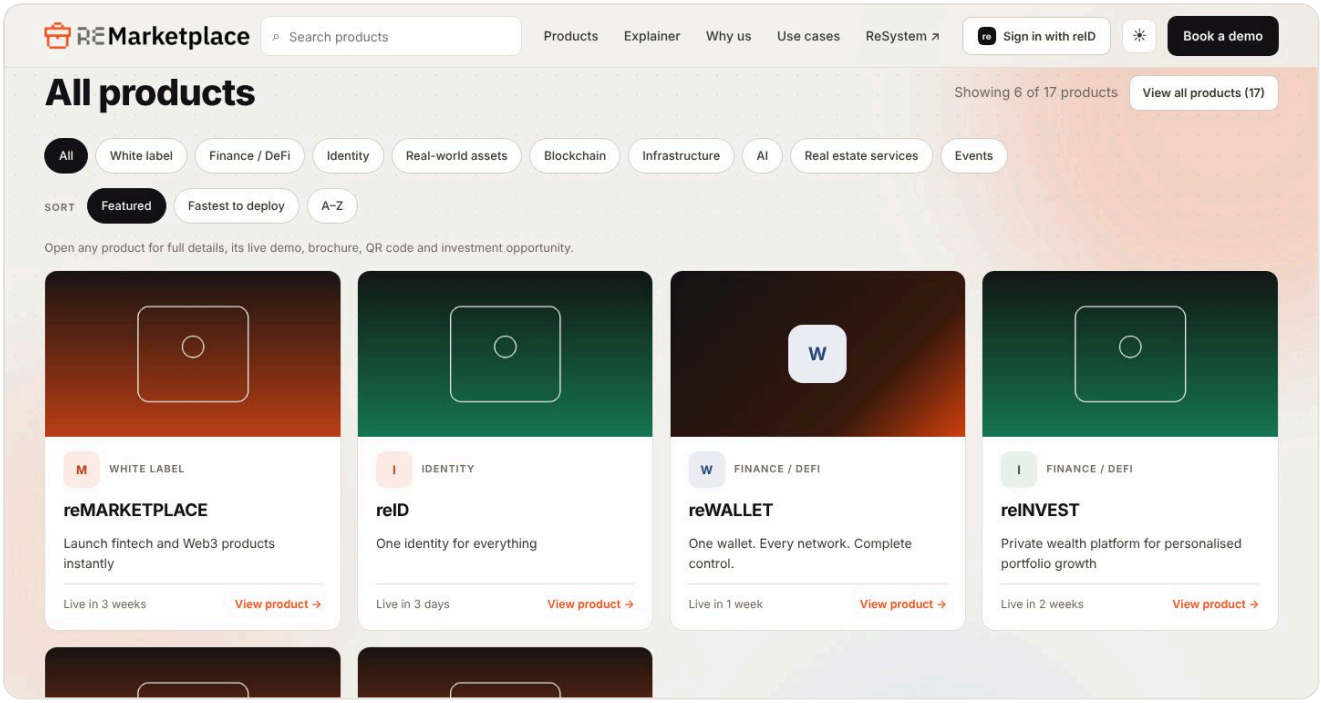

Why reMarketplace — animated cards.

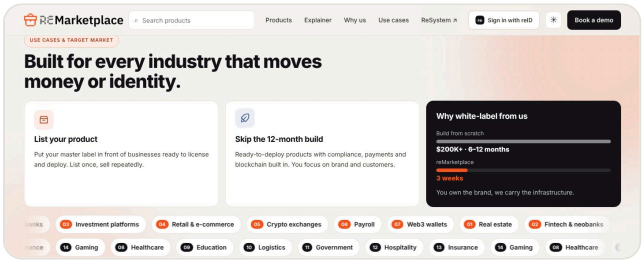

Listing steps — scroll-driven highlight.

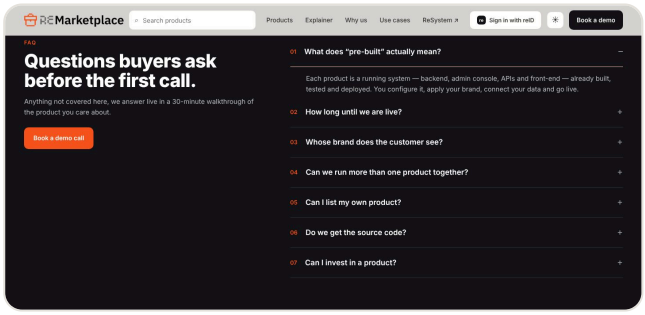

Glossary + main QR card.

All products — search, category chips, default homepage set with “View all products (N)”.

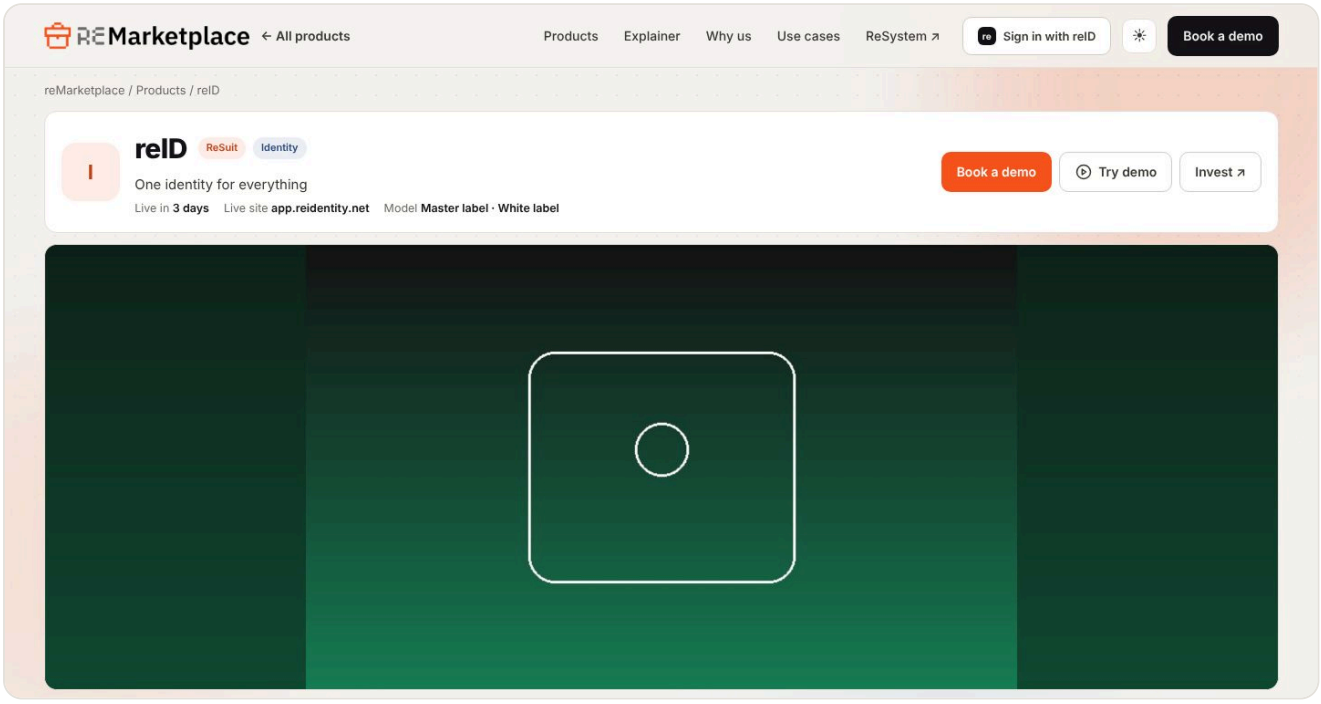

Use cases & target industries.

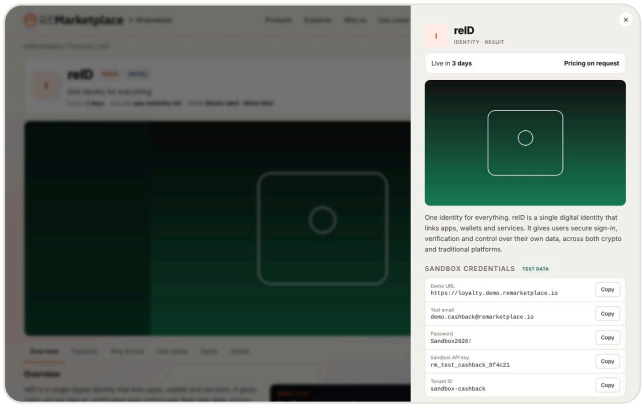

FAQ (also emitted as FAQPage JSON-LD).

04 Product pages & demo credentials

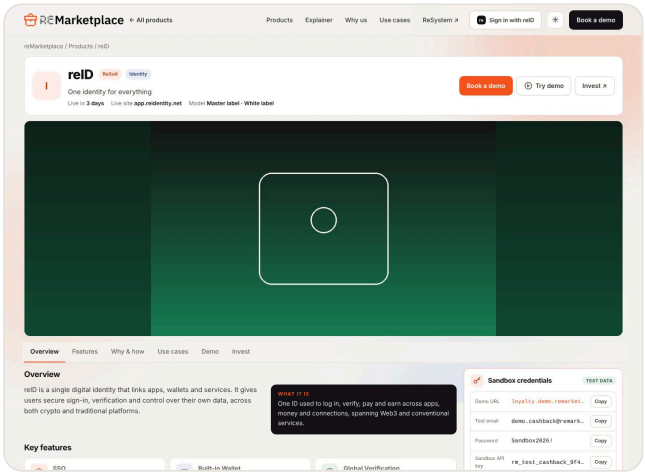

Each product has a compact, full-width page at `/product/<slug>`: one hero banner, sticky tabs, overview, features with icons, why / what you can do, numbered use cases. The side panel holds the sandbox credentials, brochure tiles (desktop / mobile PDF), investment card and a share QR. Featured products appear in the side panel and at the bottom.

Product page — header card, banner and side panel.

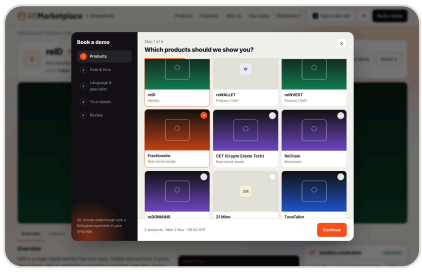

"Try demo" drawer — credentials with Copy buttons and TEST DATA badge.

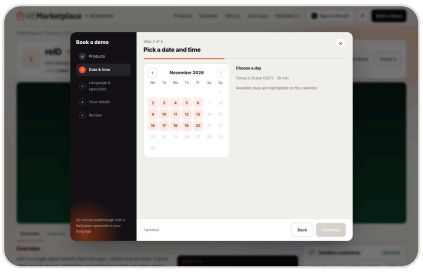

Full page with featured products.

05 Book-a-demo flow & emails

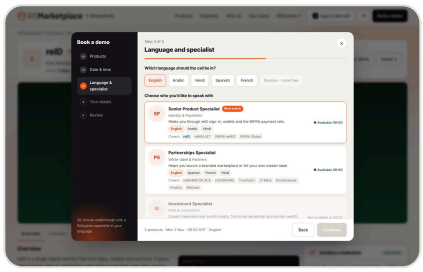

Opened from the header button, product pages and CTAs. Steps: **Products** (multi-select with images) → **Date & time** → **Language & specialist** (real people with photos) → **Details** → **Review**.

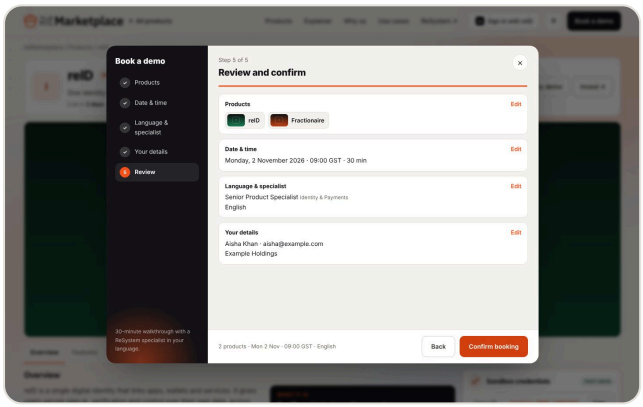

1 · Products

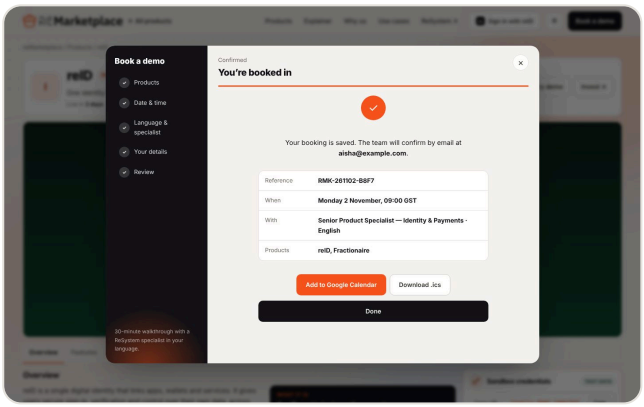

2 · Date & time

3 · Specialist

5 · Review

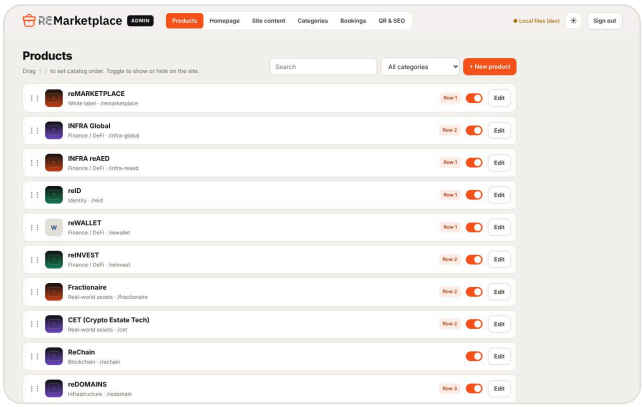

Done — Google Calendar + .ics

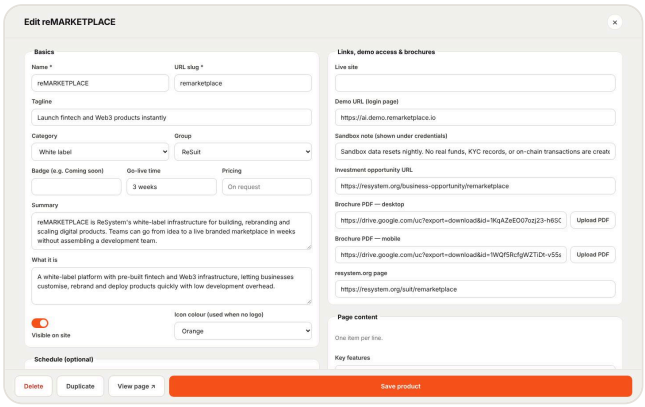

Server rules

- Slots shown only when an agent who works that day/hour, speaks the language and covers the product is free.
- Server re-validates window, minimum notice, working hours and language; unique `slot_key` prevents double booking (HTTP 409).
- Rate limit 8 bookings / hour / IP.
- Two branded HTML emails (customer + info@remarketplace.store) with an `.ics` invite.

06 Admin — product handling

Products list — drag ⋮⋮ to reorder, switch to show/hide, row and schedule badges.

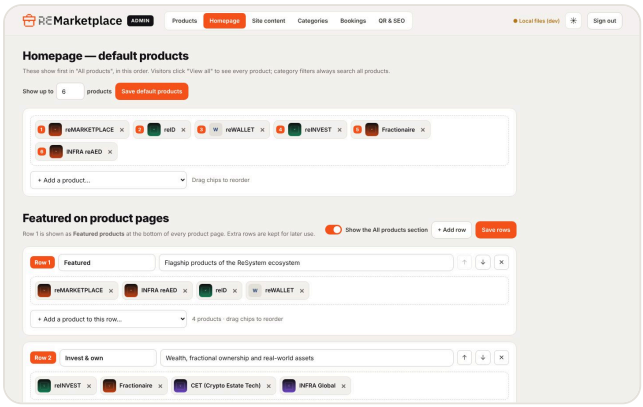

Product editor — full-screen, sections in columns.

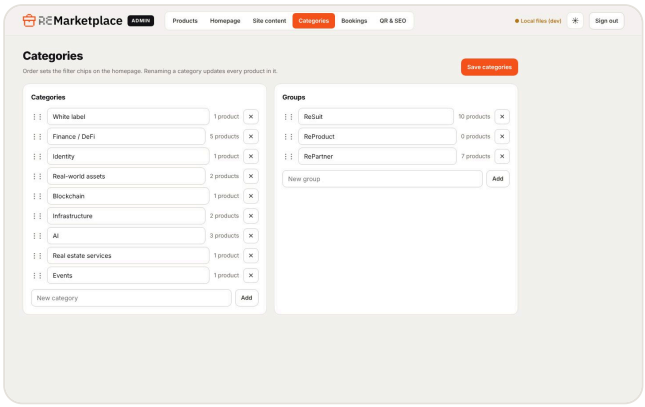

Everyday tasks

Task	How
Add a product	**+ New product** → fill Basics → upload card image → Save
Hide temporarily	Toggle the switch in the list (data kept)
Schedule a launch	Editor → Schedule → Show from / Hide after (Dubai dates)
Change order	Drag ⋮⋮ in the list; saves automatically
Demo credentials	Editor → Sandbox credentials, one `Label | value` per line
Brochures	Editor → Links → Upload PDF (desktop + mobile)
Copy a product	**Duplicate** → creates a hidden draft

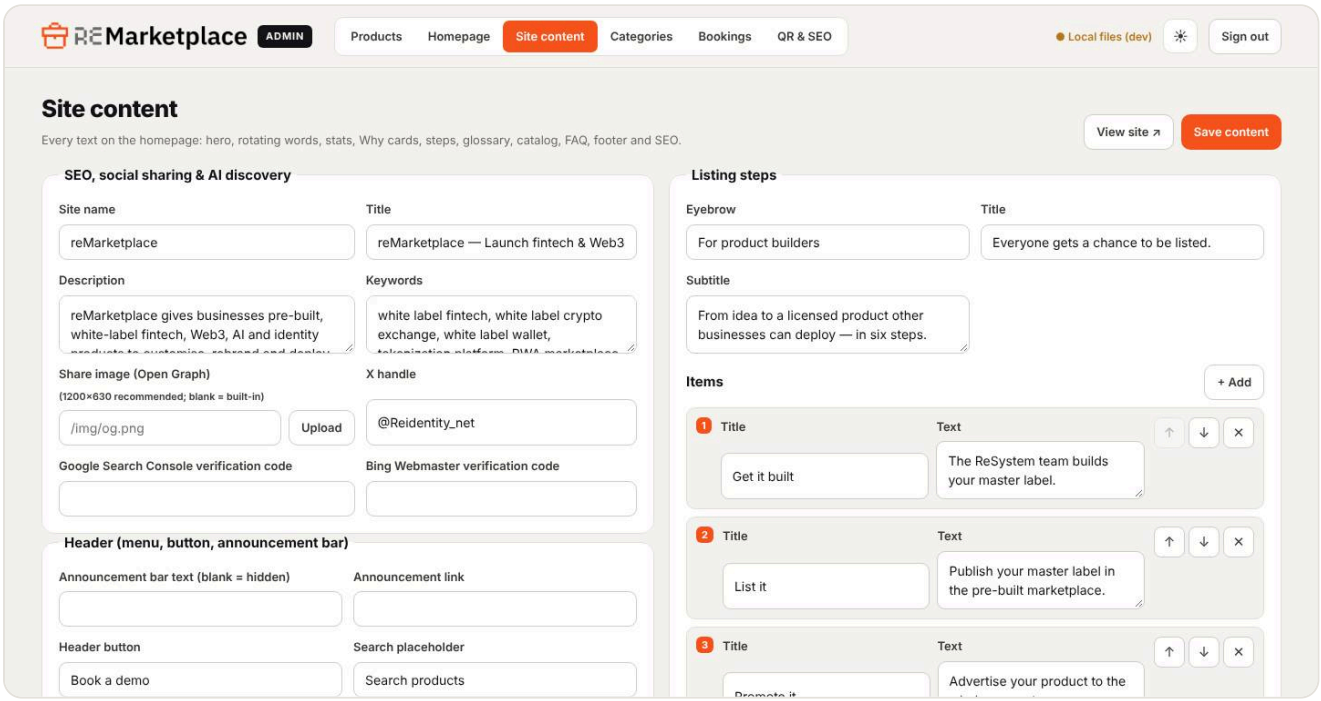

07 Admin — homepage, content, bookings, QR

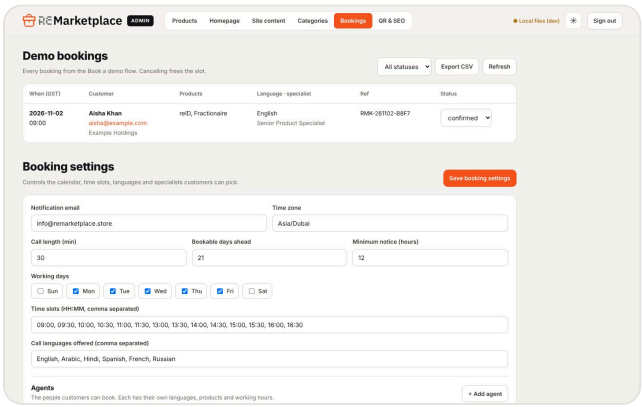

Homepage — default products & featured row.

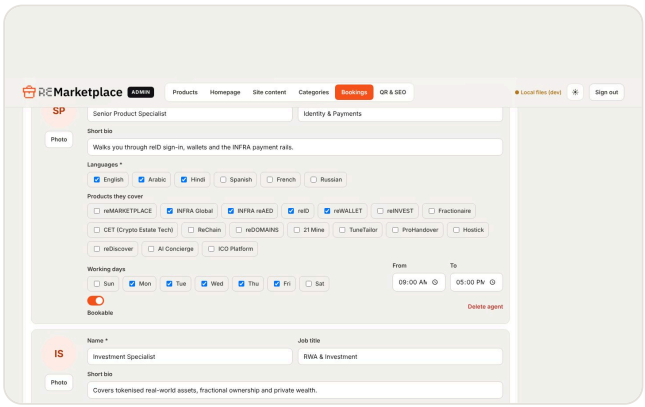

Categories & groups.

Site content — every text on the site incl. header, footer, SEO.

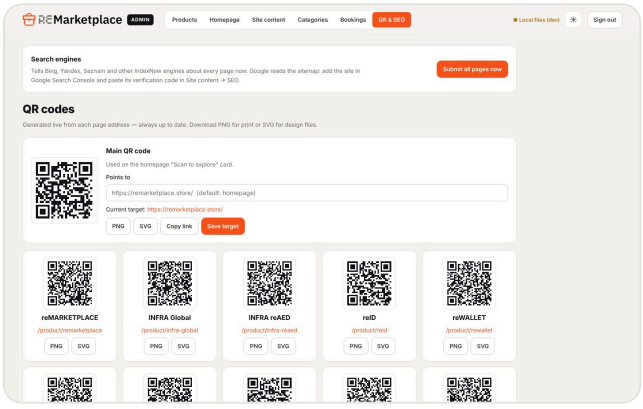

Bookings — status, CSV export, rules.

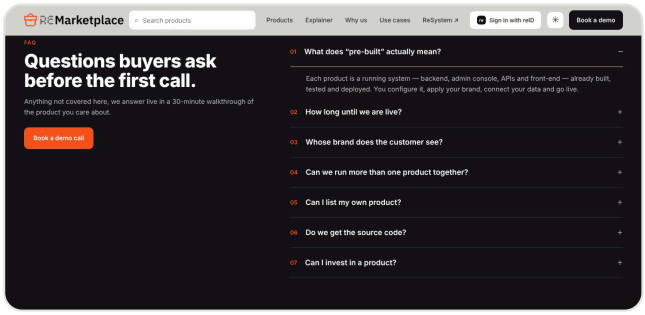

Agents — photo, languages, products, hours.

08 SEO, AI discovery & search indexing

Feature	Detail
Meta tags	Server-rendered title, description, keywords, canonical for home and each product
Social cards	Open Graph + Twitter; branded `/img/og.png` (1200×630), product card image per product
Structured data	Organization, WebSite, ItemList, FAQPage, SoftwareApplication (+Offer), BreadcrumbList
Sitemap	`/sitemap.xml` with image entries, auto-built from public products
Robots	All crawlers allowed incl. GPTBot, ClaudeBot, PerplexityBot, Google-Extended, Bingbot…; `/admin` blocked
AI summaries	`/llms.txt` and `/llms-full.txt`
Icons	favicon.ico, 192/512 icons, apple-touch-icon, site.webmanifest
IndexNow	Key at `/<key>.txt`; auto-ping on product save; admin button “Submit all pages now”
Verification	Google + Bing verification codes in Admin → Site content → SEO

QR & SEO — IndexNow submit, main QR and per-product QRs (PNG/SVG).

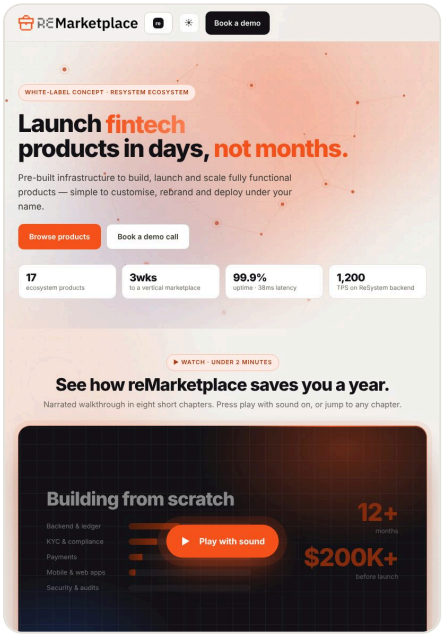

FAQ content is also published as FAQPage structured data.

Search submission steps (once the domain is live): 1) Google Search Console → URL-prefix property → HTML tag → paste code in admin → Verify → submit `/sitemap.xml`. 2) Bing Webmaster → import from Google → submit sitemap. 3) Admin → QR & SEO → **Submit all pages now** (Bing, Yandex, Seznam, Naver via IndexNow).

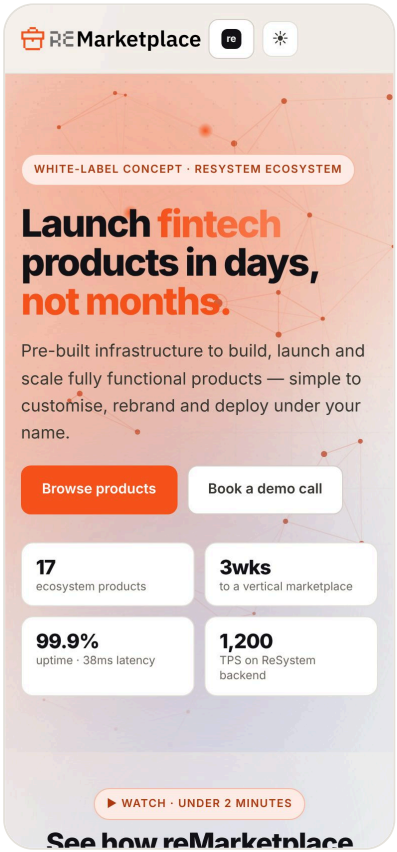

09 Responsive & quality testing

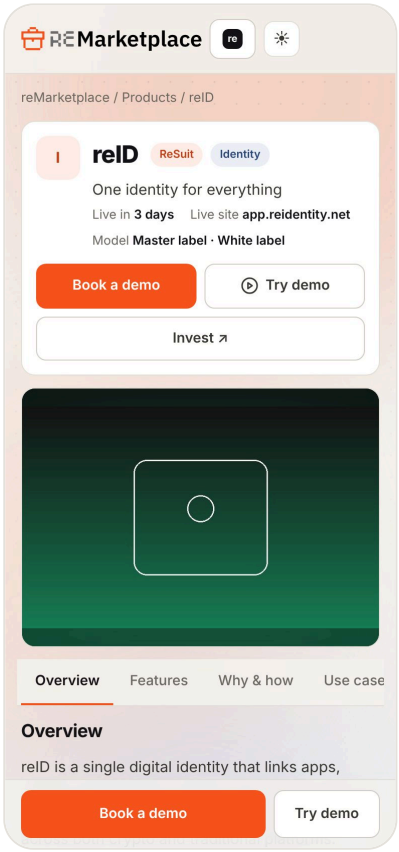

Automated Playwright pass for horizontal overflow at 390, 768, 1024, 1440 and 1920 px across home, product pages and admin, plus manual visual review.

Check	Result
No horizontal scroll — home, /product/reid, /product/aiconcierge, /admin (5 widths)	Pass
Rotating hero word: measured positions constant across words	Pass
Booking: slot conflict → 409; cancelled booking frees slot	Pass
Booking: calendar opens on first month with availability	Pass
Admin login: wrong password rejected, rate limit after 10	Pass
Hidden / out-of-schedule product returns 404 and is absent from sitemap	Pass
Explainer: scenes follow audio time, chapters seek correctly	Pass
Booking emails delivered	Pending SMTP

iPad (1024 px).

Phone (390 px): home and product page.

10 Architecture & repository

Node.js + Express, no framework or build step. Static HTML/CSS/JS front end; the server injects SEO meta and the page scripts render from JSON APIs. Every source file starts with a header comment explaining its role; full docs are in `docs/`.

```
remarketplace_website/
├─ api/index.js          Vercel serverless entry → server/app.js
├─ server.js             local entry (node server.js, port 3000)
├─ server/
│  ├─ app.js             routes, SEO page rendering, sitemap, robots, llms, QR, IndexNow, booking
API
│  ├─ admin.js           admin API (login, products, order, settings, uploads, bookings,
indexnow)
│  ├─ store.js           data layer: Supabase REST or local JSON; defaults for all content
│  └─ mailer.js          booking emails (HTML) + .ics invites via SMTP
├─ public/
│  ├─ index.html         homepage shell          ├─ product.html  product shell
│  ├─ js/common.js       header, footer, booking wizard
│  ├─ js/home.js         homepage sections, hero animation, catalog
│  ├─ js/product.js      product page, demo drawer
│  ├─ js/explainer.js    explainer player
│  ├─ admin/             admin console (index.html, admin.js, admin.css)
│  ├─ css/site.css       all site styles       └─ media/explainer.mp3, img/, favicon.ico
├─ data/products.json    seed catalog (17 products) · explainer-script.json
├─ supabase/schema.sql   tables rm_products, rm_settings, rm_bookings + bucket
├─ docs/                 ARCHITECTURE, ADMIN-GUIDE, API, DEPLOYMENT, SEO, handover PDFs
└─ vercel.json · .env.example · README.md
```

Layer	Detail
Data	`store.js` : Supabase mode when URL + service key set, else local JSON (dev). Auto-seeds products on first run.
Tables	`rm_products` (slug, data jsonb, visible, position) · `rm_settings` (key "site") · `rm_bookings` (ref, unique slot_key, status)
Security	RLS on, no public policies; only the server (service key) reads/writes. Admin behind signed cookie session.
Visibility rule	Public = visible AND showFrom ≤ today (Dubai) ≤ showUntil

11 Environment & deployment

Variable	Purpose	Status
`SITE_URL`	Canonical URLs, sitemap, QR targets	Set
`SESSION_SECRET`	Signs admin session cookie	Set
`ADMIN_USER` / `ADMIN_PASSWORD`	Admin login	Set
`SUPABASE_URL` / `SUPABASE_SERVICE_ROLE_KEY`	Database + storage	Set
`SMTP_HOST, SMTP_PORT, SMTP_USER, SMTP_PASS, MAIL_FROM`	Booking emails	To add
`REID_*`	reID OAuth sign-in (optional)	Later

Deploy

- Push to `main` → Vercel builds and deploys automatically.
- After changing env vars: Vercel → Deployments → ⋯ → **Redeploy**.
- Local: `npm install` → `cp .env.example .env` → `node server.js` → http://localhost:3000 (admin password `admin`).
- New Supabase project: run `supabase/schema.sql`, set the two Supabase env vars.

Changing the explainer

Edit `data/explainer-script.json`, regenerate audio with Kokoro (`kokoro-onnx`, voice `af_heart`), mix with music, replace `public/media/explainer.mp3` and update chapter times (`CH`) in `explainer.js`.

12 Go-live checklist & open items

#	Item	Owner
1	Redeploy after env vars; confirm admin badge shows ● **Live database**	Manoj
2	Add SMTP env vars for info@remarketplace.store; test a booking end-to-end	Manoj / IT
3	Connect remarketplace.store + www in Vercel → Domains; set DNS; update `SITE_URL`	Manoj
4	Replace the 3 placeholder agents with real people, photos, hours and languages	Ops
5	Replace placeholder sandbox credentials / demo URLs with real ones (9 products)	Product team
6	Upload card images for reWALLET, 21 Mine and the coming-soon products	Design
7	Google Search Console + Bing verification; submit sitemap; press “Submit all pages now”	Marketing
8	Rotate Supabase keys shared in chat; update Vercel	Manoj
9	Change admin password after handover	Manoj
10	Optional: reID OAuth credentials (`REID_*`)	reID team

Documentation in the repo: README.md · docs/ARCHITECTURE.md · docs/ADMIN-GUIDE.md · docs/API.md · docs/DEPLOYMENT.md · docs/SEO.md · docs/handover/ (this PDF + marketing handover).
